Transaction Failure Rate (SYSTEM + PARTNER) - 180 days

Threshold Breaches (> 5%)

Date	Failure Rate %
Tuesday, April 14, 2026	10.40
Saturday, February 28, 2026	8.37
Sunday, May 31, 2026	8.05

Where & When Is Risk Concentrated?

Spikes surface as isolated red cells, slow drift shows as a row warming left-to-right.

Risk Heatmap - % of Warning Limit (100 = at limit, red = breach)

KRI	January	February	March	April	May	June
1. Txn Failure Rate	35	167	42	208	161	44
2. Failure Velocity	98	409	122	629	465	78
3. Users ≥3 Fails	50	148	55	145	139	52
4. eKYC Drop-off	88	93	96	96	102	106
5. Manual Override	124	116	118	111	118	106
6. Overdue Training	115	119	136	150	150	150

What's Driving the Drop-off?

Liveness is the bottleneck - and it's worsening over time.

eKYC Funnel - Where Users Drop Off
